2. Body

2.1 Evaluation of National Universities and British Universities

There is a vast difference between the education system of Nepal and UK affiliated colleges. Talking about the quality of education, Herald College stands at a much higher position compared to the universities offering the similar degree in Nepal. The delayed graduation due to political or government hassles and lack of technologies has always been an obstacle with the universities in Nepal, whereas such type of problem has never arisen in Herald or British affiliated colleges. The international degree provided by universities from UK creates way more international opportunities than the degree provided colleges of Nepal. The British universities focus more on practically infused knowledge which can be applicable in real world however, Nepalese universities still lack in practical experience and are highly dependent in the theoretical knowledge. British universities have a unique learning process called LTW which stands for Lecture, Tutorial and Workshop. This learning process has been very effective for the students to learn while the universities in Nepal only focus on the marks obtained in the written exams. . Some of the popular Nepalese universities are: Tribhuvan University, Kathmandu University and Pokhara University.

2.2 Overview of Verisk Nepal

Verisk Nepal is one of the largest software development company of Nepal. The company wants to create a sustainable future for everyone. Empowering the future is the main slogan and goal of Verisk Nepal. It helps the clients with their business ideas and solution while focusing on improving the technology. Verisk Nepal has been providing software development and services to various companies and clients since 2009. The company fulfills the needs of the client from both business and strategic point of view. The company analyses and manages the risk solutions for the clients business including finance, healthcare and insurance. The company is known for its creative and convenient ideas. Verisk Nepal focuses on giving and sharing opportunities among the graduates of Nepal. It helps to empower business ideas and operations through technology.

3. Benefits of employing the Herald College graduates

The graduates of Herald College are taught both theoretically and practically with advanced learning resources from UK which makes them more confident and capable of experimenting and exploring new ideas later in their work life. The students are skilled in various field such as presentation, communication, team based working, problem solving, python, java, html, css, etc. The graduates have proper knowledge on research as the assessment are done through researching by themselves. The quality of education is really good as it makes a student an independent learner through individual research tasks. The research opportunities provided by the college gives the students an idea of real world. The college provides an international degree which will enhance the students' career path as he/she will be recognized internationally. The graduates of Herald College are trained to tackle the obstacles and problem solving skills. With deep knowledge in both practical and theoretical field the students are trained to solve real world problems.

4. Conclusion

In conclusion, Herald has always encouraged its students towards teamwork which will certainly benefit the companies. One of the things the companies look for in their future employees is dedication and Herald through its unique learning system (LTW) motives the students to be dedicated towards their studies. All in all the graduates of Herald meet all the quality a company looks for in its employees through its course, assignments and researches. Multitasking and research carried out by the students through those course promotes diligence which is also essential for a dedicated employee.
